

In the specification:

On pages 11 and 12, please amend the second paragraph beginning on page 11 and continuing onto page 12 as follows:

Referring to Figure 4, another preferred embodiment of the device of the present invention ~~as is~~ shown and as indicated as 120. In this particular embodiment, several components are combined into the one device 120, including an audio mixer, an audio or audio/video player 170 and an audio or audio/video player and recorder 160. Similar to the system 10 of Figure 1, the device 120 connects to a television and is adapted to receive a broadcast signal via antenna, cable or satellite. The device 120 may further include multiple audio and/or audio/video player devices such as a TV/TV Monitor, VCR, DVD player, CD player, cassette tape player and an AM/FM tuner. It is fully contemplated that all of these audio and/or audio/video components may be incorporated within the device ~~124~~ 120 for producing desired secondary audio signals to be mixed with or dubbed over an original audio signal. The recorder component 160 may be any one or more of various recording devices adapted for recording onto a medium, such as a cassette tape recorder, DVD recorder, CD recorder or VCR.
